

4 x 9 Postcard - Horizontal Front Side

This is the bleed: 4.125 x 9.125

Extend background colors or artwork to this line to avoid any white edges from the cutting/trimming process.

This is the cut line: 4 x 9

This is where we trim to achieve the dimensions of the final product.

This is the safe zone: 3.875 x 8.875

Keep text and desired images within this area to avoid it being cut off during the cutting process. In other words, stay away from the green line.

You can design the “front” side as desired because the mailing information that is required will go on the “mailing” side.

———— 3.5 inches ————

This is the mailing block

Create this space according to the placement and dimensions and leave it empty except for your return address in the upper left corner of this box.

You may design the rest of this side as desired in the area outside of this mailing block.
